

Success Spotlight

Veronica* is a client of the Early Learning Coalition who first came under diversion services with Kids First of Florida. During this time, Veronica and her child lived together in a room they rented from an individual and she was only making a minimum-waged salary.

Over time, she completed her case plan and her case closed, but she now qualifies for income-based services due to employment.

As a result, Veronica recently started working a job with better pay, which enables her to provide her own apartment for her and her daughter.

She recently expressed her gratitude for the services ELC provided and said without childcare, she would not have been able to get her own place, a better job as well as various conveniences in her life.

* *Not her real name*
